Make psychiatric history!

Up here in Maine, we're making some of the most exciting innovations in America.

We're the Augusta Mental Health Institute, Northern New England's outstanding JCAH - accredited hospital. Right now, we need a special breed of Board Eligible or Certified Psychiatrists to join us and help us make history. AMHI is a unitized, participatory management institution that's already a national model for providing services to a rural society.

We've done a lot already and we're not finished yet. We want only flexible, creative types interested in making great professional strides in treatment.

After a 40-hour schedule you can develop a private practice. You'll receive all normal state benefits and an unusually good retirement plan - even possibility of splendid low-cost, on-grounds housing. Salary up to \$34,543. Want more details about how you can help write psychiatric history?
